

Stavanger vs Haugesund - Match Report

Training game Stavanger Rugby Klubb vs Haugesund 7th of August. Game was split into four 20min period's.

First period:

We were all over the place and not keeping a good structure. And against a well drilled team like Stavanger that resulted in a lot of quick try's. It was not unexpected that we would get a tough start, as a new team and first ever game we had to get into our rythm.

Second period:

Like flipping a switch we really came into the game. We were defending full sets and completing ours. This period was a proper game where we got to see the potential we have as a team. And not only that, we put the first points on the board.

Third period:

Kept playing our game and put practice drills into play. Unfortunately we had only two subs and two earlie injuries, making it so the 13 on-field just had to dig-in and playe the rest of the game. Not an ideal situation, but we managed to get our second try.

Fourth period:

A hard period with a lot of defending. Stavanger showed their strong side and put in an extra gear. We had one more man leaving the field, hats of Stavanger for making the last 15min a 12v12. Final score 86-10.

As a team and club we grew a lot on this experience. All the players put there hand up and made a massive effort against Norway's best rugby league team. The score board does not reflect how big of an impact Haugesund did in the game. Taking all the experience back to training and focusing on season start 21th of August.

Big thanks to our sponsors who have supported us trough a tough time. Finally we get to represent them on the field.
